Tidy tips  
(*Layia platyglossa*) and  
Menzie's fiddleneck  
(*Amsinkia menziesii*)

Purple owl's clover  
(*Castilleja foliolosa*)

Site 300 management has a tradition of hosting a Photo Safari each spring. The Photo Safari is open to the staff of Site 300 and their guests. Participants have the rare opportunity to hike in some of the remote canyons of Site 300 and photograph the beautiful natural environment found in these areas. This year, early on a rainy Saturday morning, the Photo Safari group was led by Jim Lane, Site 300's manager, through Elk Ravine and its tributary canyons (located in the eastern portion of Site 300).
